Need For Speed Space

The Next Iteration in the Critically Acclaimed Series!

The Game:

- *You're in space, huge floating racetracks, you need to beat the rest of the players and/or ai to the finish line*

- *Asteroid's, solar flares and lasers are all obstacle's that will make the race a high octane and hazardous setting, disassociating our game apart from the average run of the mill racing games.*

- *Don't drive off the edge into the voids of space.*

World Background:

Unlike classical racing game environments, you are in space dealing with all the dangers that come with the territory.
Set in space using hovercraft cars, sometimes set on various planets.

Pillars 3-4

GamePlay

Key features

Game includes an open world segment.
Intense gameplay with high consequences for error
Multiplayer, free to play, ranking system, fun!

stonks

Closing review of whats been presented

- (we need 3 slides per person so just do sm funky jazz in here don't matter too much as long as it fits in decent enough n makes sense, thx
