Need For Speed Space

The Next Iteration in the Critically Acclaimed Series!

The Game:

- *You're in space, huge floating racetracks, you need to beat the rest of the players and/or ai to the finish line*

- *Asteroid's, solar flares and lasers are all obstacle's that will make the race a high octane and hazardous setting, disassociating our game apart from the average run of the mill racing games.*

- *Don't drive off the edge into the voids of space.*
